

“Advances in Stem Cell Research”

Lecture Series on Mondays 15:15 – 16:00

Room: HMA 30

- 14.10.24:** Dr. Nina Graffmann (Institut für Stammzellforschung und Regenerative Medizin, Uniklinikum Düsseldorf): „Induced pluripotent stem cells as a model for human liver diseases“
- 21.10.24:** Dr. Ivan Bedzhov (Embryonic Self-Organization research group, MPI for Molecular Biomedicine, Münster): “Developmental and stem cell biology of the early mammalian embryo” **(ZOOM)**
- 13.11.23:** Prof. Dr. Katharina Fleischhauer (Universitätsklinikum Essen): “Immunobiology of allogeneic hematopoietic stem cell transplantation“
- 04.11.24:** Dr. Tran Tuoc (Ruhr-Universität Bochum): “Molecular control of cortical neural stem cell genesis: implications for microcephaly in human inherited disorders“
- 18.11.24:** Dr. Christian Schröter (Leiden University):
“The wisdom of the crowd - collective mechanisms of cell differentiation revealed with stem cell models for development“
- 25.11.24:** Dr. Robert Zweigerdt (Hannover Medical School-MHH): “Healing hearts with human pluripotent stem cells?!“
- 09.12.24:** Prof. Dr. Dirk Strumberg (Marienhospital Herne): „Tumor-stem cells and stem cell-like cells: Implications for new therapeutic targets
- 13.01.25:** Prof. Mortimer Gierthmühlen (Knappschafts Krankenhaus Bochum):
“Vagal Nerve Stimulation - Indications, research and perspectives“
- 27.01.25:** Prof. Martin Leeb (Universität Wien):
“TBA“

All are welcome

As a part of master programs Stem Cell Biology & Stem Cell Medicine

Organized by Prof. B. Brand-Saberi, Department of Anatomy and Molecular Embryology
